

## MBC-Facts: Business Software

StarFinder

**IT-solutions have to be tailored to the company, not the other way round. The business software we use facilitates processes, is oriented to the questions of the company and perfectly supports cooperation with us.**

**Be it SME or corporation, we realize tailor-made software-solutions for all sectors and for individual requirements. We know for sure: In cooperation with our versed experts we will find hard- and software which offer you processes and operations tailored to your business.**

You may ask yourself: Audit-proof archive online? Is it really possible? Our answer: Yes, it is!

With StarFinder we have a digital solution so you can easily access all documents and processes in file format. With the integrated full-text-search the requested document is found swiftly and intuitively by means of keywords.

The paperless office can be hosted on your company servers (price on request). Alternatively we offer our service 'Digital Office'. This includes the installation of StarFinder as well as scanning and integration of all relevant data from the current business year.

With StarFinder you can archive all paper processes, such as files, contracts as well as digital data (emails with attachments or files).

Especially smaller companies rely on this software-solution, as StarFinder is scalable and easily customized to the corresponding company situation.

You profit from optimized processes, mobile access from all devices and secure storage. Do not hesitate to request your trial access!
